Education

Federal University of Espírito Santo (UFES) **Sep 2022 – Jun 2027**
Bachelor of Science in Computer Science *Alegre, Espírito Santo, Brazil*

Relevant Coursework

- Data Structures
- Agile Methodologies
- Analysis of Algorithms
- Databases
- Computer Networks
- Computer Architecture

Experience

V360 **Feb 2026 – Present**
Full Stack Development Intern *Rio de Janeiro, Brazil (Remote)*

- Maintain and evolve an invoice management SaaS built with Ruby on Rails, ensuring the platform's stability and continuous improvement.
- Manage and follow up on outsourced partners working on SAP integrations, ensuring quality and aligned deliveries.
- Run technical analyses to diagnose and fix bugs, improving the platform's reliability and user experience.

Contera IO **Aug 2025 – Dec 2025**
Full Stack Development Intern *São Paulo, Brazil (Remote)*

- Helped implement new features and fix bugs in a Ruby on Rails application, following good programming practices.
- Designed the UI/UX of the company's new website and contributed to its front-end using Next.js and Tailwind.

Cinética Júnior **Jul 2025 – Jan 2026**
Full Stack Developer *Alegre, Espírito Santo, Brazil*

- Built and maintained projects using Next.js, JavaScript, HTML, CSS, PHP, PostgreSQL and Bootstrap.
- Worked closely with a multidisciplinary team, strengthening my teamwork and communication skills.
- Gathered and analyzed requirements, translating client needs into practical technical solutions.
- Interacted directly with clients, managing expectations and ensuring satisfaction.

Federal University of Espírito Santo (UFES) **Jul 2025 – Jan 2026**
Marketing Director, Computer Science Student Association *Alegre, Espírito Santo, Brazil*

- As marketing director, worked on user-experience-focused design, visual identity and effective communication. Applied UI/UX principles to keep layouts intuitive and visually appealing to different audiences, and used tools such as Figma and Adobe Illustrator with attention to accessibility and responsiveness across devices.

Projects

SogeUFES | *HTML, CSS, PHP, PostgreSQL* **February 2025**

- Team-built platform that solves a real problem for UFES students: organizing study groups and finding available rooms. It lets students create groups and book rooms easily.

Personal Portfolio | *React, TypeScript, Tailwind, Docker, Linux, GitHub Actions* **March 2026**

- Portfolio built as a showcase for my projects and a hands-on playground for new technologies. It runs on a VPS inside a Docker container, with automatic deploys through GitHub Actions.

GManager | *Ruby on Rails, Bootstrap, PostgreSQL, Docker, VPS* **April 2026**

- Build-in-public internal back-office system for freelance development teams. It centralizes clients, projects, payments and team members in a single platform.

Technical Skills

Technologies: Ruby on Rails, Next.js, RESTful APIs, SQL, Tailwind, Bootstrap, Docker, Linux, Git and GitHub, Figma, Postman, TDD, SAP ABAP (fundamentals)
Languages: Portuguese (native), English (fluent)
General skills: Project Management, Organization, Communication
